

Professional skill matrix

The elements of professional development offered a clear-cut approach to self-evaluation and development during this module. As shown in my first skills matrix, I had a great base in the technical AI implementation, but had a great lack of core academic research skills. Particularly, I evaluated myself as having a high score in programming (Python, TensorFlow) and machine learning model creation, but a lower score in systematic literature review, academic writing, and statistical analysis.

SKILL CATEGORY	BEGINNER	DEVELOPING	INTERMEDIATE	ADVANCED
Research Design				✓
Academic Writing		✓		
AI Implementation				✓
Project Management		✓		
Literature Review			✓	

Statistical Analysis		✓		
Ethical Reasoning				✓
Technical Documentation		✓		
Communication Skills			✓	
Time Management		✓		
Critical Thinking				✓
Data Visualization			✓
