

What do I want/need to learn?	What do I have to do to achieve this?	What resources or support will I need?	How will I measure success?	Target dates for review and completion
Develop confidence in using machine learning models and selecting the appropriate technique	Complete advanced modules in AI and ML; practice by applying algorithms on varied datasets during lab time	Support from module tutors; access to detailed worked examples; additional tutorials from library or online platforms like Coursera	Achieving high grades in coursework and being able to explain models clearly in class or group work	December 2025
Improve interpretation of statistical findings	Review lecture notes weekly; attend optional stats help sessions; use reflection logs to identify patterns I misinterpret	Tutor drop-in sessions; library access to statistics guides (e.g., Field's <i>Discovering Statistics</i>)	Feedback from tutors and improved clarity in report writing	October 2025
Strengthen independent learning and research skills	Set weekly study goals and use a time management planner; engage with wider reading beyond class (journal articles, case studies)	Time with academic skills advisor; access to online research databases	Completion of research-focused assignments on time with good feedback; feeling more confident during seminars	November 2025
Enhance teamwork and communication in data-driven group projects	Volunteer to take roles in team projects (e.g. presenting, summarizing findings); participate in peer feedback activities	Support from group members and module leader; guidance on group project expectations	Positive peer feedback and reflection logs showing increased engagement	December 2025

Present statistical results clearly to both technical and non-technical audiences	Practice presenting in class; seek feedback on report clarity; create visual aids like charts and diagrams using R and Python	Advice from academic writing centre; feedback from tutor and peers	Improved marks for clarity in assignments and presentations	December 2025
